

Gabriel Goldstein

Software Engineer

Colorado Springs, Colorado · ggoldstein771@gmail.com · github.com/GabrielRGoldstein

PROFESSIONAL SUMMARY

Software engineer turning complicated workflows into dependable tools across systems integration, security automation, data engineering, and full-stack development.

CORE SKILLS

Languages: Python, SQL, JavaScript/TypeScript, PowerShell, Bash, Java

Systems & security: Systems integration, hardware testing, STIG, RMF, Kubernetes, Docker, Linux

Data & product: ETL, Azure, AWS, Power BI, React, Next.js, CI/CD

PROFESSIONAL EXPERIENCE

Test and Integration Specialist · L3Harris

Jun 2026–Present

Colorado Springs, CO

Systems integration, hardware verification, and delivery-process improvements for mission-critical programs.

Selected skills: Systems Integration · Hardware Testing · Kanban · Technical Documentation

- Established a shared Kanban workflow that clarified task status and ownership and helped return the project to schedule.
- Authored onboarding documentation and supported system integration and verification through hardware testing.

Cyber Security Test Engineer · nLogic

Nov 2024–Jun 2026

Colorado Springs, CO

Automated security testing and translated cyber and functional requirements into repeatable procedures.

Selected skills: PowerShell · STIG · RMF · Kubernetes

- Raised test-process automation from roughly 40% to 92.6%.
- Built reporting automation and evaluated modern security and infrastructure tooling.

Front-End Engineer · Freelance

Dec 2023–Oct 2024 · Dec 2020–Jun 2022

Los Angeles, CA

Owned client relationships and shipped ecommerce sites, landing pages, and full-stack applications.

Selected skills: React · Next.js · JavaScript · AWS

- Worked with more than 15 clients and built or maintained eight or more websites.
- Improved site traffic by an average of 40% within six months across engagements.

PROFESSIONAL EXPERIENCE — CONTINUED

Software Engineer · General Motors

Jun 2022–Nov 2023

Chandler, AZ

Delivered data products and ETL improvements for global production and supply-chain planning.

Selected skills: Python · SQL · ETL · Azure · Power BI

- Contributed to an initiative associated with approximately \$10 million in reduced expenses.
- Delivered more than 20 Power BI reports and helped cut combined project delivery time by 30%.

SELECTED PROJECTS

Discord Clone

A real-time full-stack application with servers, channels, live messaging, and video and audio calls.

Stack: Next.js · React · Prisma · SQL · Tailwind CSS

ML Stock Trading Bot

A sentiment-informed paper-trading system with automated buy and sell decisions and bracket-order risk controls.

Stack: Python · FinBERT · Alpaca API · NLP

24/7 AI Livestream

A high-availability microservice pipeline that eliminated full-pipeline downtime during service failures and increased voice throughput by roughly four times.

Stack: Docker · Kubernetes · Unity · MongoDB

Ceiling Sam

A custom Shopify storefront developed around a client's visual direction and associated with an approximately 50% sales lift.

Stack: Shopify · JavaScript · HTML · CSS

EDUCATION & CERTIFICATION

California Lutheran University

2018–2022

B.S., Computer Science · Thousand Oaks, California

CompTIA Security+

Mar 2025–Mar 2028
